Product Description

Color: Yellow Compact and sturdy, the NEGG® makes the once tedious task of peeling boiled eggs impossibly simple. Fast and fun! Add a little water and your boiled egg to the NEGG®, SNAP on the cap, SHAKE it a few times. Remove the shelled egg. It takes just seconds. Order today and join our growing family of Negg® Heads.

Product Features

- Package Dimensions: 4.2 x 3.1 x 3 inches
- Item Weight: 3.2 ounces
- Shipping Weight: 3.2 ounces
- Manufacturer: ADRIGAN SOLUTIONS
- Item model number: 319013456
- Add 1/4 cup (2egg capsful) of water to the Negg. Add your hard-boiled egg and snap on the top cap.
- Now you're ready to slip the egg out of its shell. SHAKE the Negg up and down with enough force so that the egg strikes the caps. Remember to take it a little easy, or you will end up with a shaly mess complete with shells.
- Shake until you feel the shell begin to "soften" - approximately 4 to 12 times. Timing will vary. The body is clear so you can watch the progress.
- When you see the white of the egg appear, you're done. Mission Accomplished. The egg will then slip out of its shell.
- If the egg is a reluctant sheller you may have to break the membrane after shaking to get the shell to release. This can happen with extremely fresh eggs, and is not the norm.

- Add 1/4 cup of water to the egg shell peeler. Add your hard-boiled egg and cover top cap.
- Now you're ready to slip the egg out of its shell. Shake the peeler up and down smoothly force so that the egg strikes the caps. Remember to take it a little easy, or you will end up with a slushy mess with shells.
- Shake until you feel the shell begin to 'soften' - approximately 4 to 12 times. Timing will vary. The body is clear so you can watch the progress.
- When you see the white of the egg appear, you're done. Mission Accomplished. The egg will then slip out of its shell.

Description :

Egg Shell Peeler Egg Slicer Cutter Peeling Tool egg Peeler Kitchen Tool Egg Slicer Egg Separator

- Add 1/4 cup of water to the egg shell peeler. Add your hard-boiled egg and cover top cap.
- Now you're ready to slip the egg out of its shell. Shake the peeler up and down with enough force so that the egg strikes the caps. Remember to take it a little easy, or you will end up with a slushy mess complete with shells.
- Shake until you feel the shell begin to 'soften' - approximately 4 to 12 times. Timing will vary. The body is clear so you can watch the progress.
- When you see the white of the egg appear, you're done. Mission Accomplished. The egg will then slip out of its shell.
- If the egg is a reluctant sheller you may have to break the membrane after shaking to get the shell to release. This can happen with extremely fresh eggs, and is not the norm.
