- Now you're ready to slip the egg out of its shell. Shake the up and down with enough force so that the egg strikes the caps. Remember to take it a little easy, or you will end up with a slushy mess complete with shells.
- Add your hard-boiled egg and snap on the top cap.
- Shake until you feel the shell begin to "soften" - approximately 4 to 12 times. Timing will vary. The body is clear so you can watch the progress.
- When you see the white of the egg appear, you're done. Mission Accomplished. The egg will then slip out of its shell.
- Easy to use, safe, ecologically sound, recyclable

When you're ready to slip the egg out of its shell, SHAKE the top and bottom of the container with enough force so that the egg cracks through the caps. Remember to take it easy, or you will end up with a mess complete with shells. Simply snap your hard-boiled egg and snap the top cap.

Keep shaking until you feel the shell begin to crack - approximately 4 to 12 times. The amount of shaking will vary. The body is clear so you can watch the progress.

- ★When you see the white of the egg appear, you're done. Mission Accomplished. The egg will then slip out of its shell.
- ★If the egg is a reluctant sheller you may have to break the membrane after shaking to get the shell to release. This can happen with extremely fresh eggs, and is not the norm.

Egg Stripper is Awesome!

August 13, 2018
Verified Purchase

The Egg Stripper is awesome. It makes taking shells off hard boiled eggs so easy. I love that I can do 4 or 5 at a time so that I can get to making egg salad faster! Definitely follow the instructions as the egg preparation method works better than the way I used to do it. Chilling in ice is the best way to make sure that the shells comes off quick. You might have to massage some shells off, but I had most of my shells come off just by shaking. I have recommended this product to some family and friends. It was worth every penny I spent!

Product description

Color: **Yellow**

1. The most ideal approach to peel eggs rapidly and effortlessly. 2. Put your hard boiled egg inside, include a little water, at that point gently cover the lid, shake a couple of times, and spill out your egg. Just by squeezing, your egg will slide out of the shell.

I used it the very next day and it worked exactly like it said it would

July 19, 2018

Color: Black Verified Purchase

I bought one and it came in 2 days! I used it the very next day and it worked exactly like it said it would. I boiled my eggs and then shock them with cold water. I put them in the egg peeler and the shell came right off. Nice product!

I just bought: 'Hard Boiled Eggs Peeler and Cracker Boiled Egg Shell Peeler Stripper Shake and Peel Peeling Kitchen Tool, egg opener egg tool (Yellow)' by NFE

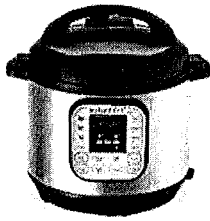

1. The most Ideal approach to peel eggs rapidly and effortlessly. 2. Put your hard boiled egg inside, include a little water, at that point gently cover the lid, shake a couple of times, and spill out your egg. Just by squeezing, your egg will slide out of the shell.

If I could say it's better than perfect, I would!

September 11, 2018

Verified Purchase

I was hesitant to purchase this at first, thinking it was going to be another gimmick, but was I sure wrong! This is a perfect gadget! Pop the egg in, add water to the halfway mark, snap the cover on and give it a few shakes (maybe a few more, depending on how hard you shake) and wa-la, the shell just slips off. The shaking causes the egg to crack all over, at which time the water gets under the shell, separating it from the egg and making it easier to peel right off. I suggest not waiting too long to peel your hard boiled eggs through, once they sit in the fridge for too long, it makes them harder to separate and peel. Well worth the purchase!

(Negg capful) of water to hold your hard-boiled egg steady. Shake the top cap.

When you're ready to slip the egg out of its shell. SHAKE the Negg up and down with enough force so that the egg strikes the caps. Remember to take it a little easy, or you will end up with a slushy mess complete with shells.

- Shake until you feel the shell begin to "soften" - approximately 4 to 12 times. Timing will vary. The body is clear so you can watch the progress.
- When you see the white of the egg appear, you're done. Mission Accomplished. The egg will then slip out of its shell.
- If the egg is a reluctant sheller you may have to break the membrane after shaking to get the shell to release. This can happen with extremely fresh eggs, and is not the norm.

Not worth the money. :(

June 13, 2017

Color: Red Verified Purchase

Sadly, this is no better than cracking the shell multiple times against the edge of the sink. As you can see, egg white still stuck to the inside of the shell. I've included a photo of the eggs after peeling them under running water to get the 'zillion pieces' of egg shell off.

ktyct lady

Knowing how to boil your egg is a must.

You have to boil the eggs correctly and know how to handle the eggs but this works GREAT IF YOY KNOW HOW TO MAKE THE EGGS PEELABLE. Read more

Product description

Color: **Yellow**

What is Labu Store Tool Egg Peeler Hard Boiled Egg Cooker Egg Shell Peeler Kitchen Tools Quickly And Easily?

Feature:

Add 1/4 cup of water to the peeler. Add your hard-boiled egg and snap on the top cap.

Now you're ready to slip the egg out of its shell. SHAKE the up and down with enough force so that the egg strikes the caps. Remember to take it a little easy, or you will end up with a slushy mess complete with shells.

Shake until you feel the shell begin to "soften" - approximately 4 to 12 times. Timing will vary. The body is clear so you can watch the progress.

When you see the white of the egg appear, you're done. Mission Accomplished. The egg will then slip out of its shell.

If the egg is a reluctant sheller you may have to break the membrane after shaking to get the shell to release. This can happen with extremely fresh eggs, and is not the norm.

Product Name: The Egg Peeler

Product material: PP+AS

The best way to peel eggs quickly and easily.

Size: about 9.8 * 6.3 cm / 3.86 * 2.48 inch

1/4 cup (Negg capful) of water to egg. Add your hard-boiled egg and tap on the top cap.

When you're ready to slip the egg out of its shell, SHAKE the Negg up and down

- with enough force so that the egg strikes the caps. Remember to take it a little easy, or you will end up with a slushy mess complete with shells.
- Shake until you feel the shell begin to "soften" - approximately 4 to 12 times. Timing will vary. The body is clear so you can watch the progress.
- When you see the white of the egg appear, you're done. Mission Accomplished. The egg will then slip out of its shell.
- If the egg is a reluctant sheller you may have to break the membrane after shaking to get the shell to release. This can happen with extremely fresh eggs, and is not the norm.

Not worth the money. :(

June 13, 2017

Color: Red Verified Purchase

Sadly, this is no better than cracking the shell multiple times against the edges of the sink. As you can see, egg white still stuck to the inside of the shell. I've included a photo of the eggs after peeling them under running water to get the 'zillion pieces' of egg shell off.

If At First You Don't Succeed.....

August 15, 2017

Color: White Verified Purchase

My first attempt at using the Negg wasn't perfect - out of 4 eggs 2 were a mess but 2 were perfect. My second attempt was perfect as I read the Negg instructions and followed the directions for hard boiled eggs. After cooking the eggs I put them in ice water to cool quickly and then after 15 minutes used the Negg. As

Red

1/4 cup (Negg capful) of water to egg. Add your hard-boiled egg and snap on the top cap.

- Now you're ready to slip the egg out of its shell. SHAKE the Negg up and down with enough force so that the egg strikes the caps. Remember to take it a little easy, or you will end up with a slushy mess complete with shells.
- Shake until you feel the shell begin to "soften" - approximately 4 to 12 times. Timing will vary. The body is clear so you can watch the progress.
- When you see the white of the egg appear, you're done. Mission Accomplished. The egg will then slip out of its shell.
- If the egg is a reluctant sheller you may have to break the membrane after shaking to get the shell to release. This can happen with extremely fresh eggs, and is not the norm.

B. J. O'DONNELL

If I could say it's better than perfect, I would!

September 11, 2018

Verified Purchase

I was hesitant to purchase this at first, thinking it was going to be another gimmick, but was I sure wrong! This is a perfect gadget! Pop the egg in, add water to the halfway mark, snap the cover on and give it a few shakes (maybe a few more, depending on how hard you shake) and wa-la, the shell just slips off. The shaking causes the egg to crack all over, at which time the water gets under the shell, separating it from the egg and making it easier to peel right off. I suggest not waiting too long to peel your hard boiled eggs through, once they sit in the fridge for too long, it makes them harder to separate and peel. Well worth the purchase!

BOILED EGG PEELER

534 customer reviews questions

\$13.90 (23%)

Save \$3.90. Eligible for \$10 bonus when you spend \$50.

(Negg capful) of water to fill your hard-boiled egg with the top cap. Ready to slip the egg out of the Negg up and down

- with enough force so that the egg strikes the caps. Remember to take it a little easy, or you will end up with a slushy mess complete with shells.
- Shake until you feel the shell begin to "soften" - approximately 4 to 12 times. Timing will vary. The body is clear so you can watch the progress.
 - When you see the white of the egg appear, you're done. Mission Accomplished. The egg will then slip out of its shell.
 - If the egg is a reluctant sheller you may have to break the membrane after shaking to get the shell to release. This can happen with extremely fresh eggs, and is not the norm.

- When you see the white of the egg appear, you're done. Mission Accomplished. The egg will then slip out of its shell.
- Add your hard-boiled egg and snap on the top cap.
- Shake until you feel the shell begin to "soften" - approximately 4 to 12 times. Timing will vary. The body is clear so you can watch the progress.

Product description

Color: **Yellow**

Hard-Boiled Egg Shell Extractor Peeler Stripper Sheller Household Kitchen Tool Portable Convenient Plastic Separator Manually Shake And Remove Shells As Shown On TV SIMPLE IN USE: Just add water to the Egg Stripper to the fill line. Enter the hard-boiled eggs and shake the egg stripper up and down for only 5-6 seconds and see the magic happening. A clear, see through plastic, will allow you to view the action of the shells sliding off. TIME SAVING: You're saving a

great deal of time. Quick breakfast, hard-boiled egg snack on the go or as an addition to your favorite salad, not to mention delicious deviled eggs for any occasion, are only seconds away when you're using our multi egg peeler! INNOVATIVE: This device extremely productive in the kitchen and the boiled eggs shells get easily peeled within seconds. It's a unique, crystal clear, sleek egg shape design with engineered nodules on the inside to help loosening the hardness of the egg shell. We carefully designed our product with a large base and opening in the middle for easy, no mess access to remove peeled eggs.

Product description

Color: Red

1. The most ideal approach to peel eggs rapidly and effortlessly.
2. Put your hard boiled egg inside, include a little water, at that point gently cover the lid, shake a couple of times, and spill out your egg. Just by squeezing, your egg will slide out of the shell.

I bought one and it came in 2 days! I used it the very next day and it worked exactly like it said it would. I boiled my eggs and then shock them with cold water. I put them in the egg peeler and the shell came right off. Nice product!

The egg peeler is made made
dly and safe materials, it
. you can use it rest

of water, add your hard-
nd snap on the top cap.

- Shake the egg up and down with the
enough force to hit the caps, separate
the shell from the egg.
- About 4 to 12times, When you see the
shell is separated from the egg, you're
done. The egg will then slip out of its
shell.
- The smooth surface make it easy to
clean. The best way to peel eggs
quickly and easily.
