# Egg Peeler

(GR) Βράστε το αυγό (αυγά) και παγώστε το (τα) σε παγωμένο νερό. Τοποθετήστε ένα τέταρτο του φλιτζανιού από το παγωμένο νερό στον αποφλοιωτή και στη συνέχεια το αυγό. Σφραγίστε το καπάκι και ανακινήστε μερικές φορές. Το πλαστικό μέρος είναι διαφανές για να μπορείτε να παρακολουθείτε τη διαδικασία. Μόλις δείτε να εμφανίζεται το ασπράδι του αυγού, είστε έτοιμοι. Το αυγό ξεφλουδίζεται αμέσως. Ο πατενταρισμένος σχεδιασμός του προϊόντος με τα εσωτερικά εξογκώματα βοηθά να αφαιρεθεί η μεμβράνη και το τσόφλι του αυγού.

(BG) Сварете яйцето (яйцата) и го (ги) охладете със студена вода. Поставете четвърт чаша студена вода в белчката и след това поставете яйцето. Затворете капачето и разклатете няколко пъти. Пластмасовата част е прозрачна, за да можете да наблюдавате процеса. Щом започнете да забелязвате белтъка на яйцето, значи е готово. Черупката се отстранява моментално. Патентования дизайн на продукта със специалните издатини във вътрешността помага за отстраняването, както на черупката, така и на мембраната на яйцето.

(RO) Fierbeți oul și lăsați-l să se răcească în apă rece. Adăugați un sfert de apă în recipient și apoi puneți oul. Puneți capacul, și agitați de câteva ori. Recipientul este din plastic transparent și puneți urmări procesul de decojire. Când vedeți interiorul oului atunci puteți îndepărta coaja. Designul patentat și denivelările din interior ajută la desprinderea membranei și decojirea oului.

(GB) Boil egg(s) and cool in an icy water bath. Put a quarter cup of cold water in the peeler, then an egg. Snap the cap into place, and shake a few times. The sturdy plastic body is clear so you can watch the progress; when you see the cooked white appear, you're done. Pinch the egg, and its shell will peel off like a jacket. The patent-pending design, including the bumps on the inside, help release the membrane and shell from the egg.

Αποφλοιωτής Αυγού

**Egg Peeler**

(GR) Βράστε το αυγό (αυγά) και παγώστε το (τα) σε παγωμένο νερό. Τοποθετήστε ένα τέταρτο του φλιτζανιού από το παγωμένο νερό στον αποφλοιωτή και στη συνέχεια το αυγό. Σφραγίστε το καπάκι και ανακινήστε μερικές φορές. Το πλαστικό μέρος είναι διαφανές για να μπορείτε να παρακολουθείτε τη διαδικασία. Μόλις δείτε να εμφανίζεται το ασπράδι του αυγού, είστε έτοιμοι. Το αυγό ξεφλουδίζεται αμέσως. Ο πατενταρισμένος σχεδιασμός του προϊόντος με τα εσωτερικά εξογκώματα βοηθά να αφαιρεθεί η μεμβράνη και το τσόφλι του αυγού.

(BG) Сварете яйцето (яйцата) и го (ги) охладете със студена вода. Поставете четвърт чаша студена вода в белачката и след това поставете яйцето. Затворете капачето и разклатете няколко пъти. Пластмасовата част е прозрачна, за да можете да наблюдавате процеса. Щом започнете да забелязвате белтъка на яйцето, значи е готово. Черупката се отстранява моментално. Патентования дизайн на продукта със специалните издатини във вътрешността помага за отстраняването, както на черупката, така и на мембраната на яйцето.

(RO) Fierbeți oul și lăsați-l să se răcească în apă rece. Adăugați un sfert de apă în recipient și apoi puneți oul. Puneți capacul, și agitați de câteva ori. Recipientul este din plastic transparent și puneți urmări procesul de decojire. Când vedeți interiorul oului atunci puteți îndepărta coaja. Designul patentat și denivelările din interior ajută la desprinderea membranei și decojirea oului.

(GB) Boil egg(s) and cool in an icy water bath. Put a quarter cup of cold water in the peeler, then an egg. Snap the cap into place, and shake a few times. The sturdy plastic body is clear so you can watch the progress; when you see the cooked white appear, you're done. Pinch the egg, and its shell will peel off like a jacket. The patent-pending design, including the bumps on the inside, help release the membrane and shell from the egg.
